

Dear TFRW Members

As we approach the November election, I'm pleased to read in club newsletters they are saying it is important that to be successful we must work together as a team. We know because of the members of TFRW, Republicans win.

Being a delegate to the National Convention, CBS and New York Times called me for a ten minute interview. They asked who I would support as the Presidential Nominee at the convention. I said, no question, John McCain. They also asked if I support President Bush, my answer ABSOLUTELY. As we well know the media phrases many of the questions to make it sound as if republicans are not happy. There are issues we might disagree with but there are many more we are united behind. That leads me to the talking points this month.

DRILL HERE, DRILL NOW, PAY LESS!!

You might say this isn't a talking point of John McCain. I say YES. He has changed his position on this because he sees the need and he hears the voice of the people. Click the following link

- **John McCain Believes That It Is Time For The Federal Government To Allow States And Localities To Open Their Oil Reserves On The Outer Continental Shelf.** The Federal Government has prohibited oil and gas leasing on most of the Outer Continental Shelf (OCS) since the 1980s. John McCain believes we should lift the federal moratorium on these areas and allow the local stakeholders and states decide whether or not they would like to allow exploration in these areas. Let's keep the energy flowing with our members and potential members. When our members are excited about their participation in an election our membership grows. The formula is: more members = more votes for Republicans. America needs every one of us to work as hard as possible.

Thank you ALL for every minute you spend helping Republicans get elected. You are the BEST team.
