## Need a FAST & EASY way to conduct a board meeting?

Meetings can be hard to schedule and my bet is that they have been even harder to schedule with this busy summer schedule that everyone has had. To make it easier to have meetings with your club boards, there is a great service that allows you to conduct conference calls free of charge.

Here is my own testimonial of how easy it is. Last week, a committee in the county I reside in decided to have a conference call instead of having all of the committee members meet at a central location. It worked great! The committee chair contacted everyone and told them the call in number, log in and password. Instead of having all committee members travel in the heat and taking time from their busy schedules, it worked great to have everyone on the conference call system from their own homes. Each attendee had the PowerPoint that we reviewed during the meeting, discussed action items to complete once we were done with the call and we were done in less than an hour and a half. This great service was easy to set up and made the whole process so much easier for all attendees.

Think how easy it would be to set up a conference call for your board when an issue arises and a decision needs to be made immediately. Below are a couple conference call companies that you can research to discover which one will be best for your club. Just remember that this service is used all throughout the business world and it is just another technology that we can use to make life easier.
